#### July 2023

# **Applications Needed for Fall:** GrowinG Internship Program 2023

## **Growing Beginning Farmers & Ranchers in Wyoming**

The GrowinG Internship Program is extending our internship season. We are excited to offer the potential for Fall 2023 internships. Internships are funded through a USDA Beginning Farmers and Ranchers grant, offering education and practical experience to qualified

applicants. "GrowinG strives to provide hands-on internships at working farms and ranches to beginning farmers and ranchers, in cooperation with state producer organizations and educational institutions," explained Kendra Faucett, Program Coordinator.

Our team is looking to connect selected hosts and interns for ten-weeks between September 1st and the end of December. The specific dates will be set by host/intern availability and the GrowinG coordinator. Interested interns and site hosts are encouraged to apply as soon as possible.

"This week has been the start of learning how to tan a hide ... we went through a stack of hides and I chose a black and tan, an Icelandic ewe from the herd." 2023 Summer Intern The program provides \$5,000 stipends for a 10-week work experience. Eligible applicants are 18 years or older who identify as ready to begin farming or who have been involved in managing their own farm or ranch enterprise for fewer than 10 years.

#### Interns

"I'd like to call myself a well-rounded

person who's seen a little bit of everything, but working sheep is

a new frontier for me."

2023 Summer Intern

Selected interns will assist a Wyoming ranch/farm with daily activities, while learning from the owner/manager and others. Interns also take part in at least one agricultural educational event, such as a UW Extension meeting, during their internship.

"Short work summaries submitted weekly help the intern reflect on day-to-day work and educational experiences throughout the internship," noted Ben Rashford one of the project co-directors. (See at **GrowinG-WY.org/post/Intern\_Tales**)

#### Hosts

Selected hosts agree to provide room and board for the internship experience. Hosts work with the intern to provide safe and educational learning experiences, keeping in mind their learning objectives

when possible. "We encourage interns and potential hosts to apply now" said John Hewlett project co-director. "A state committee will help select candidates and match interns with host sites, beginning in mid-August."

### Applications

Online application forms for Fall 2023 internships are available at GrowinG-WY.org. The site offers background information on the overall project, as well as links to collections of helpful resources and materials for beginning farmers and ranchers. "We rotate both groups every three days or more to keep our pastures healthy

For more information, contact the GrowinG Internship Program at information@GrowinG-WY.org or GrowinG-WY.org. and regenerative. We have to keep a pretty detailed account of our pasture rotations

by entering the

rotations into

an excel sheet"

2023 Summer Intern

Kendra Faucett is the GrowinG Internship Coordinator in the Department of Agricultural and Applied Economics, University of Wyoming College Agriculture, Life Sciences and Natural Resources. Faucett may be reached at (307) 766-3799 or kfaucet2@uwyo.edu. Ben Rashford is Department Head and Associate Professor in the department. Rashford may be reached at (307) 766-2386 or brashfor@uwyo.edu. John Hewlett is a farm and ranch management specialist in the department. Hewlett may be reached at (307) 766-2166 or hewlett@uwyo.
